

IMMEDIATE RELEASE

February 10, 2010, Milford, NH

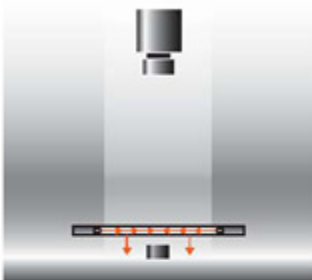

New "Thin Type" Machine Vision LED Dome Lights at LDDLIGHT.com

The new IFH Series Thin Type Dome Lights from LDDLIGHT.com are only 8mm thick, requiring only a small fraction of the installation space that traditional dome lights take, yet they deliver a wide angle of illumination that was previously available only from hemisphere style dome designs. With LEDs mounted horizontally along the edges and patent pending optics that integrate the lighting and viewing planes, this ultra-thin design is capable of providing the uninterrupted, wide angle, uniform and shadow-free illumination needed when imaging shiny irregular surfaces. Unique within our [Dome Series](#), the IFH optics eliminate the "dark spot" that can be caused by a standard dome light's non-illuminated camera aperture.

Available in six sizes with illuminated areas of 25 x 25, 50 x 50, 75 x 75, 100 x 100, 150 x 150 and 200 x 200 millimeters, IFH models are available with red, white, blue or green LEDs. Additional wavelengths or sizes may be custom ordered.

To see all available IFH Thin Type Dome models and pricing, visit <http://www.lddlight.com> and enter "IFH" into the site's Search Box.

The IFH Thin Type Dome Provides Uninterrupted, Wide Angle Illumination for Shadow-Free Imaging of Shiny Irregular Surfaces

The IFH Thin Type Dome Eliminates Shadows and Reflections on the Shiny and Dimpled Surface of this Pop-Top Can
